

I feel it is imperative that you NOT change the current ownership policy for media ownership. I am totally opposed to this measure. We the American public are all ready at the mercy of 5/6 corporations that give up what news we get, unless we are smart enough to seek other sources for information. To increase the number of media outlets one corporation can have will limit even further the nations' need to know. This action will push us over the edge into becoming a third world country with government controlled public information; learning only what the government wants us to see, hear and read; re the current situation concerning the truth about what happened to Private Lynch. The writers' of the Constitution must be spinning right about now. first an unnecessary war, and total control of the media by the government and its agents. DO NOT RUBBER STAMP THIS ACTION. IT IS WRONG. I know Mr. Powell does not care what the people think, but, he had better grow up and go study his history. this republic was established by the people, for the people, etc. He is not the people.
